DETAILED ACTION

Response to Amendment

Election/Restrictions

The Examiner notes non-elected claims 10-16,24-29 are canceled.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

This issue was ignored in the previous Responses.

Claim Objections

The objections to duplicate claims is withdrawn because of Applicants' amendments.

The objections due to minor informalities are withdrawn because of Applicants' amendments.

3. Claim 1 is objected to because of the following informalities: last line, "the" should be inserted before subsequent for clarity. Appropriate correction is required.

Claim Rejections - 35 USC § 101

The rejection under this heading of claim 17 is withdrawn because of Applicants' amendments of the claim.

Claim Rejections - 35 USC § 112

The amendments in response to the 35 USC 112 rejections of the Previous Office Action are acknowledged and appreciated, and the Examiner withdraws the rejections. New rejections are necessitated by amendment.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 17,34,35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claims 17, 34 are vague and indefinite because the claims fail to set forth any definite positive process steps to delimit the intended process.
- Claim 34 is vague and indefinite because the relative or indefinite terms (1) "small" does not convey the intended size of the bag, is not defined by the specification, and by virtue of its relativity would be unascertainable to one skilled in the art; (2) "pouch-type" does not clearly convey the intended packaging; (3) the meaning of "cushion-tube" in context is unclear.
- Claim 35 is vague and indefinite because the relative term "highly" does not convey the intended degree of charging, is not defined by the specification, and by virtue of its relativity would be unascertainable to one skilled in the art.

Response to Arguments

6. Applicants extensive review of the Examiner's previous Office Action and lengthy arguments are noted; response thereto is moot because the amendments have overcome most of the rejections/ objections as noted, except as repeated; the new rejections/ objections are necessitated by amendment.

7. The prior art does not teach nor suggest a method of manufacturing a flexible packaging material from a film or film-like laminate by transferring and applying thermally activated hot-sealing adhesive coating particles by electrostatic means onto at least a surface of the film or

film-like laminate, and then solidifying the adhesive, the adhesive properties being reactivated by heating in a subsequent sealing operation. Claims 1-5,7-9,18-23,30-33,36-40 are allowable as would be claim 35 if the rejection under 35 USC 112 was overcome.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
